

Appln. No.: 10/723,627

Amdt. Dated: July 7, 2004

Reply to Office action of April 29, 2004

IN THE SPECIFICATION

Please amend the following paragraphs as follows:

Paragraph [0007] appearing on page 3:

[0007] Accordingly, the invention provides an anchor mechanism to prevent movement of the mobile base and, if desired, raise the wheels of a mobile frame off the support surface. The anchor mechanism may be attached to an existing frame or mobile unit as an after market device as well as an [~~OEM~~] original equipment device.
